

AOVASC

Amsterdam Open Vascular Course

Improve your open vascular surgical skills with this unique hands-on workshop! It's possible to learn and train not only anastomosis, but complete open vascular procedures in a life-like situation.

Thanks to the unique Fix4Live preserving method bodies maintain their flexibility and tissue color and can be perfused. Procedures will be performed in state of the art operation rooms in our skill center, enabling an operative training setting very similar to a real life procedure.

Enhance your open vascular skills!

- carotid endarterectomy
- carotid subclavian bypass
- retroperitoneal iliac bypass
- suprarenal aorta repair
- femorocrural bypass
- visceral rotation

7 and 8 June 2018

Reactions from participants AOVASC 2017

'very realistic setting'

'direct hands on feedback from faculty'

'should be obligatory in vascular surgical training programmes'

'you learn the most from all the small tips and trick you receive during the day'
